

Curriculum Vitae

Joe Bloggs

Birth Date: 1st October 1977

Driving Licence: B Category

Personal Experience

After 26 years in the IT industry I have developed a strong background working with Microsoft and familiar with Unix/Linux Operating systems on predominantly IP routed networks. My experience in various roles has covered a broad range of technologies where I have specific depth of knowledge in Windows client-server architecture, Terminal services, Unix/Linux support, LAN/WAN support, Database Server Administration, scripting and some programming.

I believe in an ethic of hard work, commitment and loyalty and exhibit that attitude in every task for which I take ownership of. My track record shows success in both team and individual work and able to converse with those who are technical and those who are non-technical in an appropriate manner.

IT SKILLS

Core skills and expertise.:

- Windows Server 2003, 2008, 2016, 2022 support and configuration
- Windows Client (3.11 all through to 11) support and configuration
- Microsoft IIS 7 installation Support and configuration
- Microsoft SQL Server Database 2016 administration
- Oracle 10g - 12.2c Database Server administration
- PostgreSQL V15 - Database Server administration
- Scripting Languages: powershell/batch/vbscript/bash/sql
- LAN/WAN support and configuration
- Unix/Linux support VMware Workstation/Oracle VM VirtualBox
- Web development -: HTML, CSS, JavaScript, NodeJS and Docker.
- AI Tools: NotebookLM, ChatGPT, DeepSeek, Ollama(Gemma4), Claude Code.

Education and Qualifications

(1991 – 1994) Cambridge ‘O’ Levels

English Language (C), Religious Education (B), Art (B), Science (B), Mathematics (C)

(1995) City & Guilds Course T1 TELE-ELECT TRAINING COLLEGE

Distinction: Physical Science

Credits: Mathematics, Telecommunications Systems, and Communication Studies

Work Experience Time line

Milestone Systems (Formerly BriefCam)

Permanent

(<https://www.milestonesys.com/>)

Support Engineer

September 2024 – March 2026

Providing 2nd\3rd line Support in collaboration with cross-functional BriefCam Teams ensuring a good relationship with partners and customer's who use the product that is often integrated with leading VMS(Video Management systems) like Milestone and Genetec.

Daily activities included:

1. Reaching out to customers and partners via Salesforce\email in addition to using JIRA for internal escalations.
2. Scheduling remote Training\troubleshooting sessions using remote tools like TeamViewer.
3. Sharing and documenting Knowledge base articles.
4. Improving and creating internal tools for Support Team using Web-development and pwsh.
5. Attending weekly\Biweekly team meetings over Microsoft Teams.

Achievements:

1. Enhanced visual design and usability of CSV2HTML reports including adding a chart.js feature.
2. Simplified\automated tasks using Power Shell for example using pg_basebackup to easily perform Backup & Restore operations showing progress status and other scripts like Bclogviewer.ps1.

Unemployed

January 2023 – August 2024

Reason: Relocation to Hungary unsuccessful.

BeyondTrust (UK)

Permanent

(<https://www.BeyondTrust.com>)

Technical Support Engineer

January 2022 – December 2022

Apart of Technical Support Team providing 2nd\3rd line Support for queries and break fix issues using ServiceNow for supported applications. Responsible for developing & maintaining relationships with customers and team members ensuring a quick turn around of cases to relevant team members. Daily activities included.:

1. Troubleshoot and resolve customers system and network issues on prem and in Azure Cloud.

2. User\System administration in Coins-Global (ERP) and Mentor systems.
3. Running and Maintaining SQL scripts & SSIS packages for ETL processes into Mentor
4. creating SQL Reports in Informix and in MS SQL Server.
5. Resolving tickets in Autotask\Landesk call logging systems.
6. Adhering to ITIL processes during Ticket handling and Change Request procedures.
7. Attending daily Stand-up team meetings in Microsoft Teams.
8. Automating processes and tasks using Power-shell & Bash (Unix).

Epicor (Hungary)
Permanent
(<https://www.epicor.com>)

IT Technical Support Consultant
April 2015 – January 2020

Working in the Managed Services Team providing Technical Support for customers using Tropos ERP Systems which has included.:

1. Performing maintenance and configuration of Oracle (11g, 12.2c) and MS SQL Server 2012\2014 databases.
2. Troubleshooting and maintaining Windows Servers (2003, 2008, 2012) and Unix AIX systems in addition to Web applications on IIS v7 Web servers.
3. Troubleshooting LAN network issues.
4. Creating, updating and improving SQL, Batch and Bash scripts.
5. Communicating with customers via telephone, email and via the online portal ticketing system (ServiceNow) website to troubleshoot and resolve 1st, 2nd & 3rd line support cases.
6. Liaising with Development and Application Support Teams in providing customers with fixes and improvements to the Tropos database system and Tropos Web Applications (RBA\TWA).
7. Providing Quarterly Tropos performance reviews for customers and cultivating good customer relations.
8. Creating knowledge articles and procedures for reoccurring issues and updating existing ERP installation instructions ensuring they are kept up to date.

Transcom (Hungary)
Permanent
(<http://www.transcom.com/>)

Global Systems Senior Support Specialist
September 2005 - April 2015

Working within the Global IT Operations Service Delivery Team, where I am providing global systems support, and mainly responsible for the [Aspect eWFM](#) system which includes:

1. Maintaining, configuring and troubleshooting application servers (Windows 2003\2008), desktops and Sun Solaris (Avaya CMS) Unix servers.
2. Working closely with business and clients in project related activities to create and integrate services/processes in addition to automating and improving functionality.
3. Having exposure to the largest Corporate Network with more than 90 different call centres across the globe so far in my career.

Personal achievements in Transcom.:

2009 – 2010: Planned, Installed and setup Nagios (Linux Ubuntu) Monitoring solution for EWFM servers for Monitoring and Automation of tasks and notifications.
2010 – 2011: Developed Java SE application (Applet) using spring library for eWFM users to Easily Insert, validate and submit Data to an Oracle Database.
2012 – 2013: Creating SQL and VBS scripts to assist in custom reports, data validation and handling file transfers, in addition to using WMI and querying Active Directory for further information.
2014 – 2015: Working on projects to assist in Integrating, Real Time Adherence (RTA) messages and Historical Data Reports for ACD Instances in eWFM.

Computacenter (UK)
Permanent

Service Desk Analyst/2nd line Support
July 2000 – July 2005

(<http://www.computacenter.co.uk/services/managed%2Dservices/>)

Computacenter subcontracted to Unipart as a multi-organisation compromised of a 700-800 user LAN\WAN Network environment, using Ethernet, Token Ring, wireless 802.11g, 3G-Connect and VRAS. My roles and secondments at Computacenter included the following:

Service Desk -

Receiving and determining exact nature of problems (1st to 3rd line support) calls worldwide, with precise incident logging/updating/diagnosing/resolving and escalation obtained through customer liaison with interpersonal skills. Providing security and administration for Windows Domains.

Technical Support: - Supporting, diagnosing and configuring the network (VLANS on 2900 series switches) and the following Operating systems, software and hardware: Windows XP, W2k, NT4, Win95/98, win3.11, DOS. IE v5/6, Lotus Notes v4.5/6 MS Office Suite, Thin-client (Citrix) and Dame ware.

Dealer Systems: - Supporting the following bespoke systems and applications:

- ◆ Data testing for Jaguar Electronic Parts Catalogue (JEPC)
- ◆ Jaguar Parts Ordering Catalogue (JPC Live WEB)
- ◆ JPRS (Jaguar Parts Replenishment System)
- ◆ Site visits to Dealers to install/configure/troubleshoot JEPC/JPRS and JPC live.
<http://www.jepc.unipart.co.uk/> (JEPC Live parts lookup, a recent development)

Earlier experience from Zimbabwe and UK is available on request.

I have attended the following courses.:

1998 DELOITTE & TOUCHE - Administrating NT4.0 Server
1999 DELOITTE & TOUCHE - Networking Essentials
1999 DELOITTE & TOUCHE - NT4.0 Server Core Technologies
1999 CSA - Opera Remote and Paypoint Host and Stand-alone software
2000 Computacenter training update from NT4 to windows 2000
2001 Computacenter Customer Care Course.
2002 A+ Hardware and Software course
2003 Computacenter Windows XP Professional
2006 Hungarian 10 week Language Course Beginners
2007 1 Week course Business Objects, (Server Side)
2019 (January) Azure Service Fabric for Tropos Demo.
2019 (April) 2 Weeks Oracle Training Course.

Self-Study.:

May 2005: Attempted Cisco Certified Network Associate Obtaining 77%.
Hands on Experience with the following:
Cisco 801, 1605 and 2501 series routers.
Cisco 1900 and 2924 series Switches

2010 - 2011: Started learning Java Programming and SQL and
Developed Back Office application for sending
ACD reports to eWFM, utilising JDBC\SQL\JTABLE\FTP
among other numerous Java classes available.

2012 - 2014: Creating SQL(ORA) custom reports for Business requesters
Learning and creating VBS for data checking and handling files(ftp).
Learning C++ and the basics of the WIN32API (ListView Control)
via the Eclipse IDE.

March 2020: Learning python in Eclipse IDE for data science installed on a Linux
Debian system in a VirtualBox VM environment.

January 2023: Learning Web development HTML,CSS,Javascript, NodeJS, Express
sqlite and other node packages for building Websites.
<https://www.frontendmentor.io/profile/GHNetCode>

March 2024: Learning Docker,Kubernetes,Helm and AWS Cloud platform.

May 2024 : Completed AWS Cloud Practitioner Course.
Learning CICD GitHub workflows with Docker and EC2 Instances using VSC.
